-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 08 June 2006.
- 2a) This action is FINAL.                            2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-25 is/are pending in the application.
  - 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-25 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) All    b) Some \* c) None of:
    1. Certified copies of the priority documents have been received.
    2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
    3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Response to Arguments***

Applicant's arguments filed June 8, 2006 have been fully considered but they are not persuasive.

With respect to applicant's argument that Christoffel does not provide suggestion to combine, Examiner disagrees and refers applicant to the rejection of claim 1, where Examiner states that since, Christoffel teaches an absorbent pant and teaches hook and loop fasteners at the waist region that connect to another piece having complimentary fasteners at its waist regions. Christoffel teaches that the fasteners facilitate fast and easy removal of the absorbent pant. The fact that the other piece is a top or that it is disposable is immaterial. While the term disposable may appear to imply one-time use, such meaning is not guaranteed, therefore Examiner disagrees with applicant's assertion that the suit is used one time and then discarded. The existence of the releasable and reusable fasteners themselves is clear evidence of intent of repeated use of the top portion of the swimsuit. Christoffel does not teach, and Examiner has not implied, that the absorbent pant is reusable.

Examiner also disagrees with applicant's argument that there is no motivation to arrange the attachment of the pant structure to the trunk cover such that the attachment is releasable. The prior art of Christoffel clearly teaches that an absorbent structure can either be permanently attached to a top or outer garment at the waist region, or it can be refastenably attached. Therefore, a releasable attachment mechanism is a suitable alternative to a permanent fastening system, and since the pant structure of Rosch is manufactured as a separate entity that is joined to the outer trunk at their respective waist regions, a releasable attachment

mechanism taught by Christoffel is not only a possibility, it is a more desirable attachment means that a permanent one, as taught by Christoffel.

***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on March 27, 2006 was filed after the mailing date of the Application on December 15, 2003. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

***Claim Rejections - 35 USC § 103***

Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosch et al (U.S. Patent No. 6,115,847) in view of Christoffel et al (U.S. Patent Application Publication No. 2002/0087137).

With respect to **Claims 1,4,5,7,16-18,24,25**: Rosch teaches an active wear trunk garment 110 having a liquid-permeable trunk cover 114 having inner surface 111 and outer surface 113 and a waste containment structure 142 comprising a liquid-impermeable backsheet 158 having a garment-facing surface, a liquid-permeable bodyside liner 156 and absorbent core 160 sandwiched therebetween. ('847, Col. 8, lines 8-16) Trunk cover 114 has front waist, rear waist and crotch regions 131,133,149 as can be seen in Figs. 1-4. As can also be seen in Figs. 1-4, waste containment structure 142 is disposed generally within trunk garment 110. Rosch teaches that trunk cover 114 is joined to elastic members 143,145 at the waist regions ('847, Col. 10, lines 45-49), therefore Rosch does not teach that trunk cover 114 is releasably attached at the front and rear waist regions.

Christoffel teaches a girl's swimsuit wherein an absorbent pant/bottom portion 98 is releasably attached to the upper portion/bodice 42 at the front and rear waist areas via hook and loop fasteners 92 to secure the pant portion and upper portion about the waist of the wearer and for greater ease in applying and removing said swimsuit, ('137, ¶¶ 0071-0074) therefore it would be obvious to one of ordinary skill in the art to utilize hook and loop fasteners to releasably attach the outer cover 114 and garment 110 taught by Rosch so as to more easily apply and remove garment 110 as taught by Christoffel.

With respect to **Claim 2:** Rosch teaches leg openings defined by seams 187,189 in cover 114. ('847, Col. 11, lines 1-5) As can best be seen in Fig. 4, garment 110 has leg openings spaced apart inwardly from leg openings defined by cover 114.

With respect to **Claim 3:** Rosch teaches leg elastics 136,138 for pant structure 112. ('847, Col. 12, lines 25,26) Cover 114 is in the form of swimming trunks and as can best be seen in Fig.4 is designed to hang loosely about the legs of the wearer.

With respect to **Claims 6,11:** As can best be seen in Fig. 4, the crotch region of garment 110 is located inwardly of the crotch region 149 of cover 114 and not attached. Further, Rosch teaches cover 114 is configured as a pair of swimming trunks, wherein said trunks, as stated previously are intended to hang loosely about the legs of the wearer, whereas the garment contains leg elastics to fully encircle the legs of the wearer.

With respect to **Claims 8,9:** As can best be seen in Fig. 4, Rosch teaches that garment 110 has a waist opening defined by waist regions 131 and 133 corresponding to the waist regions of cover 114.

With respect to **Claim 10:** Rosch teaches pant structure 112. ('847, Col. 12, line 5)

With respect to **Claims 13,14:** Since Rosch teaches both non-refastenable and refastenable side seams ('847, Col. 11, lines 1-5, 14,15), though Rosch does not teach using them in combination, it would be obvious to one of ordinary skill in the art to modify said side seams so as to contain both refastenable and non-refastenable portions, for example having a non-refastenable portion located above fasteners 96 on each side seam, including a configuration in which the refastenable portion of each side seam comprises 25-50% of the length of the seam.

With respect to **Claim 15:** Please see the rejection of claim 1 in addition to the following: Rosch teaches that cover 114 has front panel 115 and back panel 121 having side edges 117 and 119 (front) and 123 and 125 (back). ('847, Col. 10, lines 57-65)

With respect to **Claims 19-21:** Rosch teaches pant structure 112 having left and right side panels 126, 128 respectively that extend from the front waist region 120 to the rear waist region 122. ('847, Col. 12, lines 4-12) Panels 126,128 are ultrasonically bonded and have non-refastenable seams so as to allow fastening of a front side panel to a corresponding back side panel, thus defining leg openings, as can be seen in Figs. 5,6. ('847, Col. 12, lines 18-21) As can also be seen in Figs. 5 and 6 pant structure 112 has front and back panel areas in addition to the side panels.

With respect to **Claims 22,23**: Since Rosch teaches that the side panels are elastomeric and are capable of stretching to between 10-500% of their original length ('847, Col. 8, lines 55-60), Examiner is asserting that they are capable of creating an overlap in the range set forth by applicant in claim 23 (thus also falling within the range set forth in claim 22), in both the cases of non-refastenable and refastenable seams.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie J. Hand whose telephone number is 571-272-6464. The examiner can normally be reached on Mon-Thurs 8:00-5:30, alternate Fridays 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tatyana Zalukaeva can be reached on 571-272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
